
ENVIRONMENTAL POLICY STATEMENT

As a highly established supplier and distributor of horticultural products and consultancy services to industrial growers. East Riding Horticulture Ltd (ERH) recognises the negative impact that most industries have on the environment. Therefore, ERH feel it is our duty to uphold a dedication to continuous improvements in our operational performance and the minimisation/prevention of pollution on the environment. As part of our dedication to a sustainable future and operations we carry out the following:

- Utilise sustainable planning of energy including electricity – such as light saving motion sensor lighting within the warehouse.
- Prevent pollution of air, water and land, through correct storage of chemicals in compliance with regulations.
- Minimise the use of landfill by recycling cardboard and plastics through outsourcing accredited waste management companies.
- Providing a suitable environment for wildlife habitats, including onsite bat preservation and maintaining onsite pond.
- Carry out planting onsite which promotes biodiversity wildlife.
- Actively promote a broad range of environmentally friendly products such as peat free compost biodegradable tree shelters, biodegradable plant pots, water saving products, natural pest control products etc.
- We endeavour to continuously monitor, evaluate and improve operations to minimise the impact we have on the environment.
Our Policy Statement will be regularly reviewed and updated.
