

RPR SPRINT

Racecourses

- Barenbrug-bred Regenerating Perennial Ryegrass technology (RPR)
- Exceptional wear tolerance, unparalleled capacity for recovery
- 100% Barenbrug-bred perennial ryegrass
- Broad-leafed and thrives on mowing heights > 60mm

MIXTURE:

100% perennial ryegrass

USAGE:

Construction, divoting and overseeding of racecourses.

FEATURES & BENEFITS

Designed to give you the wear tolerance and recovery needed either for flat or national hunt racing circuits.

Key to the product's unique recovery ability is *Barlibro*, a **Regenerating Perennial Ryegrass (RPR)** that produces determinate stolons (a stem that grows along the ground surface as it establishes and grows), resulting in solid ground cover and unparalleled capacity for recovery.

A major difference between equestrian surfaces and other sports is the mowing height. Industry trials mow grasses at 4-7mm, 10-15mm and 25mm, which is of little practical use to racecourse grounds managers.

RPR SPRINT is designed to be maintained at 60mm+ height of cut, which allows broader-leafed and faster growing varieties to be utilised. RPR SPRINT includes the unique agriculture grass variety, *Galgorm*, a perennial ryegrass, with excellent sward density and persistency. Fast growing and highly wear tolerant winter sports varieties *Barorlando* and *Bardorado* are also in the blend.

Racing and Polo

Discover our grass seed for horse racing and polo. Racecourse and other equestrian uses will benefit from this specialist grass seed.

- Racecourses

Specifications

Sowing rate	25-35g m ²
Oversowing rate	15-25g per m ²
Sowing depth	10-15mm
Mowing height	Down to 60mm

Composition

- 50% Barlibro RPR Perennial ryegrass
- 20% Bardorado Perennial ryegrass
- 20% Barorlando Perennial ryegrass
- 10% Galgorm Perennial ryegrass
