INSTRUCTIONS FOR USE

WHEN TO USE

Ready to Use SBK Brushwood Killer controls brambles, thistles, nettles, docks, tough weeds, woody weeds and hardwood saplings in grassland and non-crop areas. Apply from May to October (June to August for woody weeds) when soil is moist and the weeds are in active growth. Used as directed Ready to Use SBK Brushwood Killer will not kill grass. May cause damage to lawns and other fine turf. A repeat treatment may be applied after six weeks. Allow at least six weeks between application and replanting. Apply a maximum of two treatments per season.

WHERE TO USE

Use in grassland and non-crop areas. Do not apply during drought or in freezing conditions, when rain is imminent or the weeds are wet. Do not apply in windy weather and avoid drift onto broadleaved plants outside the target area. Keep off cultivated plants. Direct spray away from ponds and other surface water bodies. Keep grazing animals out of treated areas until foliage of any poisonous weeds like Ragwort have died down and become unpalatable.

Children and pets can be allowed on treated areas after spray has dried.

HOW TO USE

Shake well before use. Adjust the nozzle to give the required spray pattern and holding approximately 30cm (12 inches)

above the target weed, pump the trigger firmly to thoroughly cover weeds without run-off.

Avoid production of a fine spray that can drift onto neighbouring plants.

SAFETY INSTRUCTIONS

Protection during/in use

KEEP OFF SKIN

WASH HANDS AND EXPOSED SKIN

AFTER USE

DO NOT BREATHE SPRAY

Environmental Protection

Do not contaminate water with the product or its container
Do not empty into drains
