

Hotbox Superb

Dual Output Fan Heater

The Hotbox Superb is a 2.8kW electronically controlled fan heater. With variable settings, it can warm glasshouses in winter or provide non-heated air circulation in summer.

Half and full heat settings

Ensures optimal climate and reduced energy usage.

Fan only setting

Use purely for air circulation in the summer.

Fitted with feet and hanging loops

Easy to install in the optimum position as free standing or suspended from chains.

High output fan (250cfm, 450m³/hr)

Moves air quickly and efficiently.

Remote temperature sensor

Ensures accurate control of your glasshouse temperature with overload cut-out on elements.

Stainless steel construction

With sealed elements - built to withstand challenging, humid conditions.

Heats up to 20m²

Frost protects up to 30m²

Protected by Hotbox's 2-year warranty
