Protects plants from summer sun

Protects plants  
from summer sun

Protects plants  
from summer sun

Simply paint on.  
Sufficient to treat two  
8 x 6 ft glasshouses.

500ml

By appointment to  
Her Majesty the Queen  
Manufacturers of Fertilisers  
and Insecticides  
Vitax Limited

**Vitax Summer Cloud Greenhouse Shading** allows you to control the amount of sunlight entering the greenhouse and can reduce temperatures during the summer months.

The long lasting sunshade can be used on glass, acrylic and polycarbonate surfaces.

**INSTRUCTIONS FOR USE:** Apply from April to August to a dry surface. Dilute 1 part Summer Cloud with 8 parts water (500ml product in 4 litres of water). Apply to the exterior glass surface with a sprayer or paint brush. Start application at the top of the greenhouse and work down from the apex.

Vitax Summer Cloud is formulated for easy removal at the end of the season. When using on acrylic or polycarbonate surfaces, apply to a small test area to ensure the product can be removed completely once dry.

For the best results: Do not apply Vitax Summer Cloud to a wet surface. Do not apply if rain is forecast within 12-24 hours of application. Frost and snow will loosen the adhesion of the shade mixture.

This pack makes 4 litres of shading, sufficient to treat two 8 x 6 ft glasshouses.
