With over 30 years' experience in the industry we pride ourselves on offering quality products with the knowledge of how to use them, ensuring you receive the right product at a competitive price.

Welcome to the East Riding Horticulture Landscape and Forestry product guide

Trusted supplier.

Over 30 years' experience and knowledge.

1000's of products.

On-site warehouse stock.

National delivery.

Here at East Riding Horticulture we provide a comprehensive range of products for the landscaping and forestry industry professionals. This product guide provides information and a selection of the products we supply.

It does not showcase every product we stock and can supply, therefore please contact your Area Sales Manager or our sales office if you are interested in a product that is not featured within this product guide.

Easy to order

“ The best time to plant a tree was 20 years ago.
The second best time is now. ”

TREE PLANTING

TREE STAKES & CANES

Square Tree Stakes

Tree Stakes are beneficial in building a strong foundation of strength and stability during the growth phase. Helping to prevent wind rock and movement of the roots.

Treated and certified softwood, square sawn and pointed timber tree stakes are suitable for supporting tree guards and tree shelters. The sawn stakes are available in a number of different heights to suit most projects when undertaking tree and shrub planting.

Length	Diameter	Pack Size
75cm	25mm	1575
90cm	25mm	1575
90cm	32mm	980
120cm	32mm	980
135cm	32mm	980
150cm	32mm	980

Machine Rounded Stakes

Our Machine Rounded Stakes are pressure treated, two-way pointed at the end, and have a chamfered top.

Ideal for using with tree planting and can be used with cross bars and belting to secure trees to reduce wind damage. Perfect for supporting weld mesh guards, deer fencing and for use in larger tree planting projects.

Length	Diameter	Pack Size
1.2m	50mm	431
1.65m	75mm	203
1.8m	75mm	203
2.4m	60mm	298
2.4m	75mm	203

7ft (210cm)	36 - 40lb	12 - 14mm	100
8ft (240cm)	44 - 48lb	12 - 14mm	100
8ft (240cm)	50 - 55lb	14 - 16mm	100
8ft (240cm)	59 - 64lb	24 - 26mm	100

Weld Mesh Tree Guards

Preformed galvanised Weld Mesh Tree Guards are a popular form of protection against grazing stock and wild animals, for use in the urban and amenity tree planting.

All our weld mesh tree guards are manufactured from 12 gauge wire with a 25mm x 75mm grid size.

Our weld mesh tree guards are made-to-order. Please be aware there is a lead time for delivery of these items, typically up to 2 weeks. Please contact the sales office for availability.

Available colours: Uncoated or Green Coated
Suggested support: Tree Stake or Bamboo Cane x2

Height	Diameter
120cm	300mm
180cm	200mm
180cm	300mm

Shelterguard Mesh Tree Shelter

Shelterguard Mesh Tree Shelters protect trees from browsing animals such as rabbits and deer, while providing a sheltered environment to encourage strong early growth.

Manufactured from a recycled plastic mesh with a 12mm mesh aperture and a clear polyethylene film lining for a sheltered micro-climatic environment, adds shelter, allows light to penetrate and encourages good strong early growth.

Available colours: Olive Green, Brown and Black
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
60cm	80 - 110mm	4	100	1
75cm	80 - 110mm	4	100	2
90cm	80 - 110mm	4	100	2
120cm	80 - 110mm	4	60	2

TREE PLANTING

TREE SHELTERS

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Shelterguard Mesh Shrub Shelter

Shelterguard Mesh Shrub Shelters protect shrubs from browsing animals such as rabbits, while providing a sheltered environment to encourage strong early growth.

Manufactured from a recycled plastic mesh with a 12mm mesh aperture and a clear polyethylene film lining for a sheltered micro-climatic environment, adds shelter, allows light to penetrate and encourages good strong early growth.

Available colours: Olive Green, Brown and Black
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
60cm	130 - 160mm	4	60	2
60cm	150 - 180mm	4	60	2
60cm	170 - 200mm	4	60	2

Treeguard Mesh

Made from recycled plastic, Treeguard Mesh offers reliable plant protection from browsing animals such as rabbits, hare and deer, without the microclimate for enhanced growth.

Treeguards are suitable for the protection of evergreens which often grow too rapidly in an enclosed tree shelter. Manufactured from a recycled plastic mesh with a 12mm mesh aperture.

Available colours: Olive Green, Brown and Black
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
60cm	80 - 110mm	4	100	1
75cm	80 - 110mm	4	100	2
90cm	80 - 110mm	4	100	2
120cm	80 - 110mm	4	60	2

Shrubguard Mesh

Made from recycled plastic, Shrubguard Mesh offers reliable plant protection from browsing animals such as rabbits, hare and deer, without the microclimate for enhanced growth.

Shrubguards Mesh are suitable for the protection of evergreens which often grow too rapidly in an enclosed tree shelter. Manufactured from a recycled plastic mesh with a 12mm mesh aperture.

Available colours: Olive Green, Brown and Black
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
60cm	130 - 160mm	4	60	2
60cm	150 - 180mm	4	60	2
60cm	170 - 200mm	4	60	2

Easywrap

Easywrap's twin walled wrap structure with a vertical split makes it easy to install and remove. It is designed to expand as the tree grows, while providing a better environment for young plants.

Measuring 60cm high and with a diameter of 50mm, expanding to 65mm, this offers flexibility and a cost effective solution for your tree guard requirements.

Available colours: Green
Suggested support: Bamboo Cane (if required)

Height	Diameter	Nest	Bundles
60cm	50mm expanding to 65mm	2	150

Voleguard

Tubex Voleguard protects young trees from damage by voles and mice.

Voleguards are a tightly rolled plastic cylinder which is split vertically and designed to hold its shape and retain sufficient overlap to enable the tree guards to expand as the tree grows.

Voleguards can be pulled open to fit around the young tree and will then spring back into shape, enabling them to be simply pushed into the soil to create an effective barrier against vole and mice attack.

Available colours: Brown
Suggested support: None required

Height	Diameter	Colour	Nest	Bundles
20cm	38mm	Brown	3	50

Standard Shrub Shelter

Twin walled Tubex Shrub Shelters provide improved survival rates by protecting trees against hares, rabbits and voles as well as providing complete herbicide protection.

Quick and easy to remove, and are ideally suited to landscaping projects with mixed planting stock. Two adjustable cable ties.

Available colours: Green
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
60cm	130 - 160mm	4	28	2

TREE PLANTING

TREE SHELTERS

Standard Tree Shelter

Tubex Standard Tree Shelters enhance tree growth, through creating a micro-climate and protecting the tree from browsing agents, like animals or herbicides. UV stabilised polypropylene, harmless to the environment.

Provides a micro-climate for trees which results in better initial establishment and higher survival rates, allowing for the planting of smaller trees which are cheaper and easier to source, and ultimately lead to trees with stronger roots.

Available colours: Green
Suggested support: Tree Stake

Height	Diameter	Nest	Bundles	Number of Ties
75cm	73 - 105mm	5	100	2
120cm	80 - 120mm	5	60	2
150cm	80 - 120mm	5	60	2

More Tubex products available from East Riding Horticulture. Please contact us for more details on 01904 608157 or email sales@erh-ltd.co.uk

Planet Tree Guards

Planet Tree Guard Shelters are a highly effective tree protection and support solution made from polythene mesh.

The lower part of the structure is to protect against herbicides and a mesh upper structure to protect from browsing animals.

Lower part of the tree guard is translucent to ensure good light diffusion which is beneficial to plant growth. Planet tree guards are lightweight, and easy to handle.

Available colours: Green, Brown and Black
Suggested support: Bamboo Canes x2

Height	Diameter	Mesh Size
60cm	130mm	10mm

Mesh Tree Guard Rolls

Mesh Plastic Tree Guard Rolls are perfect for creating your own size tree or shrub protection guard against browsing animals such as rabbits or deer.

Can be cut to any required size on site with any required diameter when tree or shrub planting. Manufactured from high density polyethylene, long lasting and rot resistant.

Available colours: Green, Brown and Black
Suggested support: Bamboo Canes or Stake and Cable Ties/Staples

Height	Roll Length	Mesh Size
0.6m	50m	13mm
1.2m	50m	13mm

FORTETUB TREE SHELTER

EXCLUSIVE PRODUCT

The ForteTub double layer design creates a microclimate for the plant, and a flared rim protects against damage and windburn and offers protection of trees against animal browsing and herbicide spray.

Exclusive to East Riding Horticulture, the ForteTub range of tree shelters are firmly established within leading forestry and landscaping organisations in the UK.

ForteTub is an effective protective tube and greenhouse for the conservation of all types of agricultural and forestry plantations, composed of photodegradable polymers. In addition, ForteTub offers protection from both rodents and other larger animals.

- Available in three sizes: 60cm; 75cm and 120cm
- 75 - 100mm Diameter
- Available in three types; Smooth, Micro-hole and Shaded
- Nests of 5 (120cm in 4)
- 250 per bag (60cm and 75cm), 140 per bag (120cm)

TREE PLANTING

SPIRAL TREE GUARDS

Spiral Tree Guards

rainbow professional

Spiral Tree Guards are used extensively as a cost efficient way of protecting young trees against browsing animals such as rabbits, hares, sheep and row deer.

Manufactured from 100% recycled PVC, and offers a life expectancy of at least four seasons.

- Quick and easy to install
- Can promote thickening for hedging applications
- Offers protection of young trees without strangulation as trees mature

Available colours: Clear, Green Tint, Brown
Suggested support: Bamboo Cane (if required)

Height	Diameter	Nest	Carton Qty	Carton Weight
45cm	38mm	5	250	12kg
60cm	38mm	5	250	17kg
75cm	38mm	5	250	20kg

Bio Spiral Tree Guard

rainbow professional

Bio Spiral Tree Guards are used extensively as a cost efficient way of protecting young trees against browsing animals such as rabbits, hares, sheep and row deer. Manufactured from 100% biodegradable materials, and offers a life expectancy of 3-4 growing seasons.

- 100% recycled materials and compostable
- 100% biobased
- Non-toxic

Available colours: Green Tint
Suggested support: Bamboo Cane (if required)

Height	Diameter	Nest	Bundles	Number of Ties
45cm	38mm	5	250	12kg
60cm	38mm	5	250	17kg
75cm	38mm	5	250	20kg

Bio Vole Guard

rainbow professional

Bio Vole Guard is designed to protect young trees from the damage of browsing animals such as voles and mice, it prevents them from ring barking the trees. They are suitable for use in a wide range of conditions, however they are best suited in overgrown areas, as this is where voles are most commonly found.

- 100% recycled materials and compostable
- 100% biobased
- Non-toxic

Available colours: Green Tint

Height	Diameter	Nest	Bundles	Number of Ties
60cm	130-160mm	4	60	2 Ties
60cm	150-180mm	4	60	2 Ties
60cm	170-200mm	4	60	2 Ties

DEFENDER-PRO

The DEFENDER-PRO tree shelter not only offers faster tree growth and increased survival rates but it is also able to reduce the cost of planting and maintenance.

The square construction of the DEFENDER-PRO enables it to be delivered to the point of application 'flat pack' thus enabling larger quantities to be transported easier and at a lower cost than the conventional round rigid tree shelter. The unique staking and securing system of the DEFENDER-PRO ensures planting is done simply and swiftly whilst maintenance can be carried out with the same level of simplicity and speed.

Manufactured from environmentally responsible and 100% recyclable UV stabilised polypropylene the DEFENDER-PRO has a built-in radial top lip to minimise abrasion to the tree stem and a perforated line to ensure the shelter splits open as the girth of the tree increases in size.

Now with perforated splitting line

Technical Information

- Manufactured from UV stabilised polypropylene
- Harmless to the environment
- Durable twin-wall construction
- Designed to be transported flat pack
- Estimated life span 5 – 7 years
- 100% recyclable
- Radial top lip to minimise abrasion to tree stem
- Unique 'no ties' securing system to the tree stake
- Perforated line allowing the shelter to split open as the girth of the tree increases in size

Specifications

- Tree Shelter Heights: 60cm, 75cm, 90cm, 120cm, 150cm
- Cross section size – 8.5cm x 8.5cm
- Shrub Shelter Heights: 60cm and 75cm
- Cross section size – 15cm x 15cm
- Bundle quantity – 50
- Colour – Light Green

rainbow professional

Our Eco Earth Tree Shelters are an eco-friendly alternative to the traditional plastic products used to protect young trees. Made from a water-resistant board, which has been coated to give it additional protection.

- 100% Biodegradable
- 100% Compostable
- 100% Recyclable
- Quick and easy to install with no ties staking system
- 3-year life span
- Harmless to the environment
- Reinforced folding lip
- Transported flat pack to reduce haulage costs
- Made from special water-proof cardboard
- Green alternative to plastic tree protectors
- FSC-approved cardboard
- Made from natural material
- Available in four sizes: 60cm; 70cm; 120cm and 150cm
- 100mm Diameter

TREE PLANTING

TREE BELTING, TREE TIES & ACCESSORIES

CAN'T FIND WHAT YOU ARE LOOKING FOR?
CALL US ON
01904 608157

Rubber Tree Belting

Rubber Tree Belting is a more environmentally friendly option compared to PVC belting. All trees should be staked and tied if they need support due to their size or if they are likely to be exposed to high winds. Offering more stretch than the PVC belting, aiding the tree's wind resistance, Rubber Tree Belting is ideal for securing larger trees.

Rubber Tree Belting has a life expectancy of eight years.

Width	Thickness	Roll Length
25mm	2mm	10m
38mm	2mm	10m

PVC Tree Belting

PVC belting is a cost-effective way to secure trees. Allowing some stretch, helping the tree's wind resistance. All trees should be staked and tied if they need support due to their size or if they are likely to be exposed to high winds. The PVC belting can be used in conjunction with our range of hoop collars, rubber blocks and rubber jumbo spacers.

PVC Tree Belting has a life expectancy of ten years.

Width	Thickness	Roll Length
25mm	2mm	25m
38mm	2mm	25m

Easy Fix Belting

Easy Fix PVC Belting is over 40% stronger than standard belting. Reinforcements are made to the belting nail areas, and nail holes are pre-formed which prevents nails doing further weakening damage to the belting, whilst allowing for easy installation.

Supplied with matching Hoop Collars at one every 33cm of strap.
Easy Fix Belting has a life expectancy of ten years.

Width	Thickness	Roll Length
25mm	2mm	25m
32mm	2mm	25m

Hoop Collars

Hoop Collars will hold any type of tree tie or strap while forming a buffer between tree and stake to prevent them rubbing against each other in windy conditions.

Available in two widths; 25mm and 38mm.
100 collars per pack.

Rubber Tree Cushions

Made from eco-friendly rubber, the tree cushions feature a hollow middle to offer a soft support between the tree stake and young tree, to allow for movement.

To suit tree belting with widths of 25mm and 38mm.
100 cushions per pack.

TREE PLANTING

TREE BELTING, TREE TIES & ACCESSORIES

Spacer Sleeves

Made from eco-friendly rubber with excellent weather-resistant properties. A low cost alternative to slotted blocks.

Supplier cut up to 1.2m
Available in two widths;
25mm and 38mm.

100 sleeves per pack.

Rubber Blocks

Made from eco-friendly rubber, made to fit between the tree and stake to ensure very little movement of the tree. Include nail holes through the block to aid easy installation.

Available in two widths;
25mm and 38mm.

100 blocks per pack.

Buckle Tree Ties

Our Buckle Tree Ties are manufactured from unbreakable polycarbonate making it uniquely strong and able to withstand the incredibly high loads that winds can apply to the middle of the buckle. Tree ties should be used to secure feathered, standard and heavy standard trees to machine rounded stakes.

Buckle Tree Ties have a life expectancy of ten years.

Length	Width	Pack Size	Length	Width	Pack Size
30cm	12.5mm	100	45cm	25mm	100
38cm	12.5mm	100	60cm	25mm	100

Supersoft Tree Ties

Supersoft Tree Ties are manufactured from soft plastic. The moulded grooves on the inside of the face aid grip whilst minimising damage to the tree bark. Acting as a 'figure of 8', which eliminates the need for a spacer or block.

Supersoft Tree Ties have a life expectancy of ten years.

Length	Width	Pack Size	Length	Width	Pack Size
30cm	12.5mm	100	50cm	22mm	100
40cm	22mm	100	60cm	22mm	100

Chainlock Tree Tie

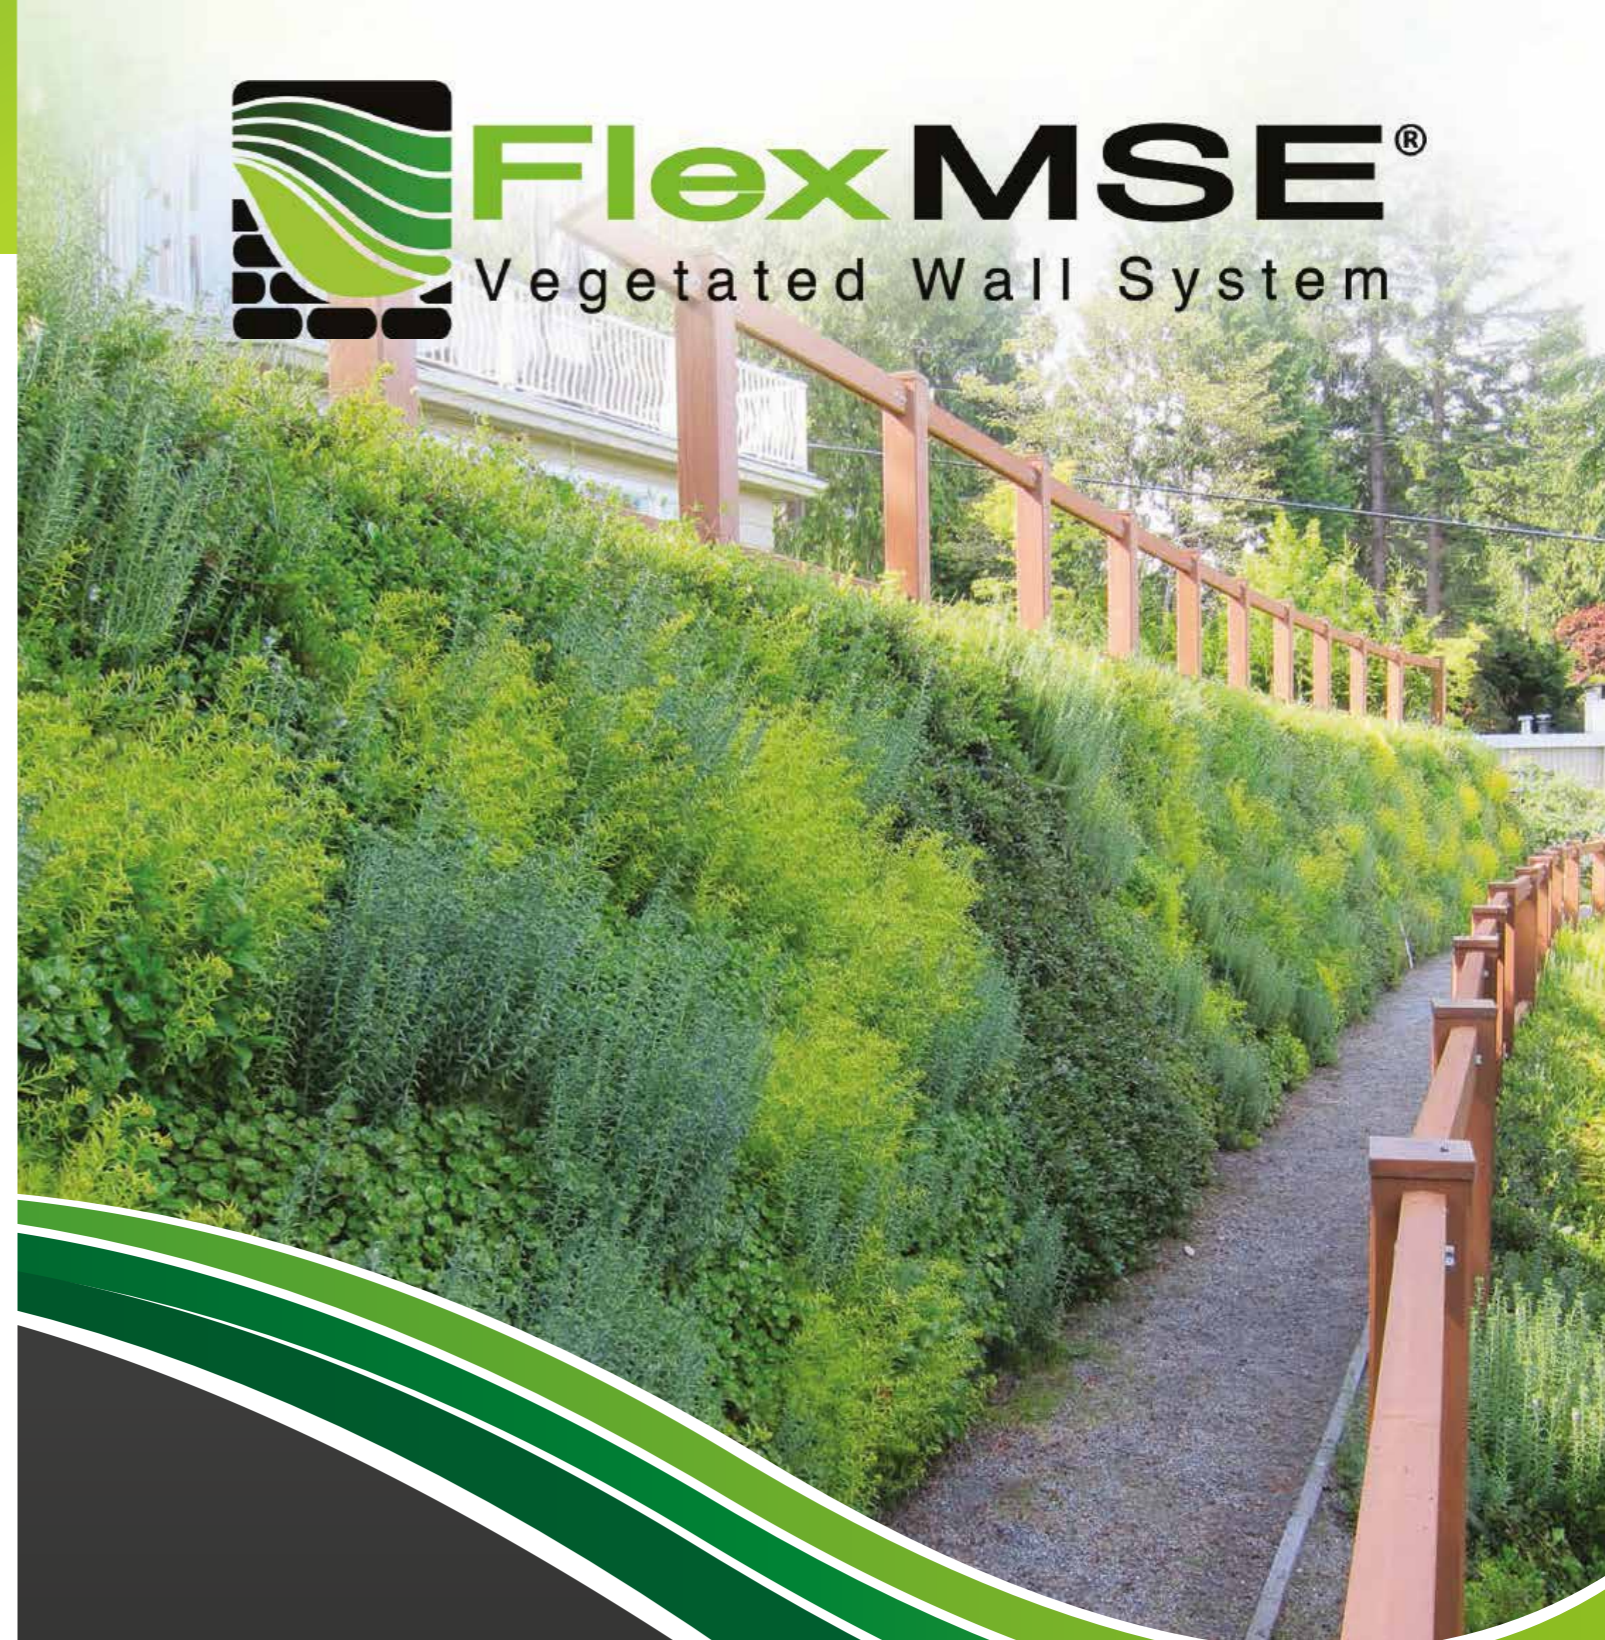

Chainlock Tree Ties offers a quick, simple, versatile tree tie system to secure trees and even shrubs. Used widely for tying, tree support and strapping purposes, the chainlock tree tie is both adjustable and reusable.

Length	Thickness	Roll Length	Length	Thickness	Roll Length
11.4mm	2.5mm	25m	25mm	2.5mm	25m
11.4mm	3.8mm	25m	25.4mm	3.8mm	25m

FlexMSE[®]

Vegetated Wall System

THE ECOLOGICAL SOLUTION

For Erosion Control, Retaining Walls, Highways and Waterways

WEED CONTROL & NETTING

MULCH MATTING & WEED MATTING

Polypropylene Woven Mulch Weed Matting

Woven polythene is manufactured from UV resistant polythene so light cannot penetrate the material, to provide unbeatable weed suppression whilst allowing clear passage of air, allows water to drain through and nutrients to get to the tree roots. Long lasting and much stronger than plain UVI Mats.

- Lasting for approximately five seasons
- Secured using barbed pegs

		Roll Width	Roll Length
		0.3m	100m
		1.05m	100m
		2.1m	100m

50cm x 50cm	100	4.15m	100m
100cm x 100cm	100	5.15m	50m / 100m

Polythene Mulch/Weed Matting

Polythene weed mats are an extremely cost effective method of weed control, whilst helping the reduction of water loss.

Manufactured from 500 gauge (125 micron) photodegradable polythene, pre-cut with a slit to the centre for easy installation.

- Lasting for approximately three seasons
- Secured using barbed pegs

		Roll Width	Roll Length
		0.3m	100m
		1.05m	100m

100cm x 100cm	100	5.15m	50m / 100m

Jute Mulch/Weed Mats

Jute mats are 100% biodegradable and manufactured from 100% jute fibres.

These jute weed mats suppress weeds, protect plant roots from frost, and retain moisture in arid conditions, whilst allowing moisture to pass through in damp conditions.

- Lasting for approximately two seasons
- 100% biodegradable
- Moisture control and temperature control
- Easy to install

		Roll Width	Roll Length
		1.2m	30m
		2.4m	30m
Mat Size	Pack Size

80cm x 80cm	100		
120cm x 120cm	100		

Geosynthetics you can trust

Terram Standard Geotextiles

Nonwoven geotextiles to enhance the performance and design life of granular layers by providing filtration and separation functions.

Terram geotextiles provide an effective solution to the problem of constructing a stable granular layer over soft foundation soils.

When stone is placed directly on a soft subgrade, the imposed load often causes intermixing of 2 layers. This results in contamination of the stone layer and a resulting loss in bearing strength, surface rutting and deformation at the sub-base/subgrade interface.

Features

Engineered to provide high strength and high elongation at break

Manufactured from high tenacity UV stabilised polypropylene fibres to provide long term durability in all soil types

Manufactured using a randomly orientated web to provide completely isotropic properties

Excellent uniformity with high permeability and low pore size for soil filtration

Applications

Paved and unpaved roads

Railways

Car Parks and hardstandings

Cycleways and footpaths

SuDS installations

Green roofs

Geosynthetics you can trust

Terram Rootguard™

Permeable geotextile that provides excellent resistance to root development.

Terram Rootguard™ is used to protect buildings, walls, paths, drainage pipes, cables and lawns from potential damage caused by root development.

Tree roots grow very close to the surface and are the cause of considerable damage. Structures with shallow foundations can be undermined. Damaged pipes, or pipes with faulty joints can become blocked by roots.

PRODUCT	ROLL SIZE (m)	CBR PUNCTURE RESISTANCE	COLOUR	MATERIAL
TERRAM Rootguard	2.25 x 25	3250N	Black	Non-Woven PP/PE
TERRAM Rootguard Plus	2 x 25	2550N	Black	Non-Woven PE/HDPE coated

Terram Weedguard™

Permanent permeable weed suppression geotextile for landscaping, gardening and construction applications.

Terram Weedguard™ weed-control geotextile is designed to allow the passage of water, oxygen and nutrients while blocking weeds. Ideal for gardening and landscaping applications, for its effectiveness and easy installation.

Features

- Weed-control fabric which avoids the use of chemicals
- Lightweight and simple to install
- Maintenance free and resistant to microbiological and chemical attack
- Ideal for landscaping, garden beds and beneath decking

Mulchtex

Mulchtex is a spun bonded polypropylene weed control fabric with high levels of UV stabiliser which allows air, nutrients and liquids to pass through soil.

Mulchtex acts as a weed barrier and enables easy planting, by pre-cutting cross holes in the fabric. Because it is a spun bonded material, it can be easily cut without fraying.

- Available in 50gsm as a standard, but other weights are available upon request
- Available in a range of sizes to cater for all levels of protection

WEED CONTROL & NETTING

WINDBREAKS & ANTI BIRD NETTING

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

MonoPEX Windbreak

MonoPEX

MonoPEX can dramatically reduce wind impact by reducing water loss, soil erosion, windborne diseases. MonoPEX is a superior knitted windbreak constructed from high density polyethylene monofilament, designed to reduce wind speed by 50%.

Supplied as standard with eyelets top and bottom for easy fixing, cost effective and light.

Available colours: Green
Shade value: 50%
Material: Monofilament (5 years UV)

Width	Roll Length
1m	50m
1.5m	50m
2m	50m
3m	50m

Anti Bird Netting

Anti Bird net is a standard quality 25mm mesh with single stitch strong thread. It is suitable for installation on a frame to keep out birds and rodents.

Also available is our superior quality 20mm mesh with double stitch mono-thread.

Available colours: Black
Life span Standard: 5 years
Life span Premium: 10 years

Length	Length
2m	100m
4m	100m
8m	100m
12m	100m

Crop Protection Fleeces

Crop Protection Fleece is made from non-woven spun bonded polypropylene and has been developed to be durable yet very strong.

- Ideal frost protection for delicate and young plants.

EROSION CONTROL & TREE ANCHORS

TREE ANCHORING & GROUND EROSION CONTROL

Tree Anchor

A comprehensive range of kits and installation tools are available to provide above and below ground anchoring for standard and semi-mature tree transplants up to 20m high.

Benefits:

- Planting at the nursery line
- Reduced overall installation time
- More secure fixing creating better establishment
- No unsightly stakes or timber above ground
- Suitable for most rootballed, airpot and containerised stock
- Four leg options available for larger trees

Please contact East Riding Horticulture for further details.

Turf Reinforcement Mesh

Turf Reinforcement Mesh is designed to protect heavily used grass areas, including temporary or overflow parking, or for vehicle traffic to prevent turf damage.

It can also be laid and removed during events, as well as being suitable for long term protection. The mesh has a unique anti-slip curved structure for extra protection when used in wet conditions.

Please contact East Riding Horticulture for further details.

Rite Pav Erosion Control

A permeable alternative to traditional paving, Rite Pav is the modern way to create erosion free footpaths, golf buggy paths, turf ed car parks, driveways, hard surface parking areas.

Rite Pav is a porous surface which will retain water for gradual release to drainage systems and absorb heat more, therefore helping the environment. Rite Pav will also greatly enhance the appearance of the area once it is filled with a decorative shingle or grass.

Manufactured from 100% recycled polyethylene, Rite Pav products are designed for long term use. The design is perfect for supporting healthy grass growth, Easily clipped together. Gives a finish suitable for any kind of traffic whether vehicle, animal or pedestrian.

Benefits of Rite Pav:

- Easy to install in interlocking squares
- Prevents soil compaction
- Improves drainage
- Protects against wear
- Grass can be mowed as normal
- Allows over 90% grass cover
- Tile size: 500mm x 500mm x 40mm deep
- Packed in pallets of 58 sq m. (4 Pieces per sq m)

EROSION CONTROL & TREE ANCHORS

LIVING WALLS

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

FlexMSE®

Vegetated Wall System

- CIVIL INFRASTRUCTURE
- ANYWHERE LAND MEETS WATER
- EROSION PROTECTION
- LANDSCAPING, DEVELOPMENT AND GARDEN WALLS
- RETAINING WALLS AND MOTORWAY WALLS
- GOLF COURSES AND PARKS

FlexMSE® Vegetated Wall System

FlexMSE® is an innovative, cost effective, sustainable and permanent engineered solution for constructing living walls with retaining wall qualities.

- **Reduces installation times.** Can be installed in up to 50% of the time that it takes to install a conventional retaining wall.
- **Cost effective.** Generally 40-50% less cost than other systems
- **Easy to construct.**
- **Longevity.** 120 year design life and 75 year warranty
- **Encourages Biodiversity.** Owing to its ability to support a broad range of plants

HOW FLEXMSE® WORKS

- FlexMSE® is a patented engineered solution for vegetated retaining walls and erosion control.
- FlexMSE® Bags and Interlocking Plates are used to build naturally resilient Geomodular structures.
- A unique soft building material which exhibits hard material qualities, FlexMSE® is a retaining wall system that gets stronger and greener as time goes on.

FLEX MSE BAGS ARE

- Filled with sand and organics
- An ideal 'planter block' for many types of vegetation
- Water and root permeable
- Flexible enough to create almost any contour or angle

FLEX MSE PLATES ARE

- Made from 100% recycled material
- Designed to bridge the gap between bags to create an interlocking mechanical connection
- Engineered with friction strips greater bag to bag connection and geogrid hooks to connect to soil reinforcement

East Riding Horticulture can supply pre-filled FlexMSE® bags or unfilled bags depending on client requirement. Both solutions are delivered by pallet for ease of loading/unloading.

GRASSES EXPERTS

GROUND MAINTENANCE

GRASS SEED

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Green Velvet: The All Rounder

GREEN VELVET[®]

A great multi-purpose, everyday grass seed that will deliver a lawned area for the rough and tumble of everyday use while giving a quality and attractive appearance.

- A great grass seed for areas of grass that get everyday use
- Rapid germination and establishment from the perennial ryegrass grass seed
- Withstands heavy foot traffic and wear
- Ideal to create a lawn or landscape area which looks good and can be used by everyone
- Attractive appearance
- Will produce a very fine leaved and dense lawn
- Rapid stabilisation for embankments

Pack Size	Content
10kg	60% PRG / 40% Strong Fescue
20kg	60% PRG / 40% Strong Fescue

Green Velvet: The Shady One

GREEN VELVET[®]

A high quality grass seed mixture that is specifically formulated to create an excellent lawn in shady places.

- Shade tolerant grass seed
- Ideal for areas under full or partial shade
- Designed to perform under tree canopies
- Works near fences, under obstacles (such as trampolines etc) or anywhere the sun doesn't get to but you want grass coverage
- Improved tolerance to common diseases
- Good tolerance to drought

Pack Size	Content
10kg	30% PRG / 20% Slender Fescue / 30% Strong Fescue / 20% Hard Fescue
20kg	30% PRG / 20% Slender Fescue / 30% Strong Fescue / 20% Hard Fescue

Green Velvet: The Action Hero

GREEN VELVET[®]

A hard wearing grass seed mixture that contains tough wearing grasses which is ideal for playing areas with high traffic.

- High levels of perennial ryegrass in this mixture give it substantial ability to withstand wear and tear
- Ideally suited to parks and landscaped areas with a lot of traffic and wear
- Would also be ideal for playing areas and sports fields
- Hard wearing ryegrass specifically chosen for the job
- Gives an attractive lawn that's extremely tough

Pack Size	Content
10kg	80% PRG / 20% Strong Fescue
20kg	80% PRG / 20% Strong Fescue

GRASS SEED

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Green Velvet: The Perfectionist

GREEN VELVET.

A fine and luxury traditional grass seed mixture delivering a superior, quality result for a lawn with a wow factor.

- Non-ryegrass and fescue blend for exceptional golf-green type quality
- Luxurious, quality look for areas with lower levels of traffic and wear
- A very fine leaved and dense lawn
- High quality and beautiful looking lawn from this premium grass seed
- Improved tolerance to common diseases
- Ideal for the traditional ornamental lawn in professional landscaped areas

Pack Size	Content
10kg	40% Strong Fescue / 30% Chewings Fescue / 30% Slender Fescue
20kg	40% Strong Fescue / 30% Chewings Fescue / 30% Slender Fescue

Green Velvet: The Mow Saver

GREEN VELVET.

A unique grass mixture that establishes fast and requires less mowing. As simple as that.

- Thanks to rapidly-germinating properties of the varieties selected in this mixture, fast establishment of a new lawn is possible
- On top of that, a lower growth height and a slower regrowth (after cutting) also means mowing frequency is reduced. So you really do get the best of both worlds
- Fewer mowing sessions also means a lower cumulative clipping weight, saving you time and money

Pack Size	Content
10kg	50% PRG / 35% Slender Fescue / 15% Chewing Fescue
20kg	50% PRG / 35% Slender Fescue / 15% Chewing Fescue

Barenbrug Essential: E1 - Value Lawn & Landscape

BARENBRUG

Value for money with no compromise on quality.

Value Lawn & Landscape mixture is simple yet effective. A basic blend of perennial ryegrass and fescue that germinates quickly, creates a durable turf and is suitable for all soil types.

- Great value for money
- Ideal for lawns and general landscaping works
- Reliable blend of amenity ryegrass and fescue
- Fast establishment

In the bag	
60%	Perennial ryegrass
40%	Strong creeping red fescue
Sowing rate: 25-35g per m ²	
Height of cut: Down to 15mm	
Pack sizes: 10kg; 20kg	

Barenbrug Essential: E2 - Tough Turf

BARENBRUG

Hardwearing mixture for areas of intense usage.

For areas that are subjected to year-round use. Ideal for use on school sports fields which are in use for winter and summer sports. The robust perennial ryegrass varieties provide wear tolerance whilst the creeping fescue helps to create an exceptionally tight-knit turf. The inclusion of fescue species also aids performance during spells of dry weather. For hard-wearing family lawns subject to pets and children - this is the best choice.

- Suitable for multiple applications
- Playing fields, parks, hard-wearing 'family' lawns
- Quick establishment and excellent wear tolerance
- Creates a thick and strong surface

In the bag	
40%	ESQUIRE Perennial ryegrass
40%	BELLEVUE Perennial ryegrass
20%	MAXIMA Strong creeping red fescue
Sowing rate: 25-35g per m ²	
Height of cut: Down to 15mm	
Pack sizes: 10kg; 20kg	

Barenbrug Essential: E3 - Universal Turf

BARENBRUG

All round aesthetics and wear tolerance.

A great multipurpose grass seed mixture for areas that demand great aesthetics combined with the ability to withstand high wear. Suitable for a wide range of scenarios, from golf course to cricket outfields. Wear-tolerant perennial ryegrass is enhanced with fine leaved fescues. The result is an exceptionally dense and strong turf.

- Excellent appearance combined with durability
- Good tolerance of drought conditions
- Fast establishment
- A golf course fairway type mixture, ideal for use on quality lawns and landscaping

In the bag	
40%	BARRISSE Strong creeping red fescue
20%	BELLEVUE Perennial ryegrass
20%	FANDANGO Perennial ryegrass
20%	BARCHIP Chewings red fescue
Sowing rate: 25-35g per m ²	
Height of cut: Down to 12mm	
Pack sizes: 10kg; 20kg

GROUND MAINTENANCE

GRASS SEED

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Barenbrug Essential: E4 - Fine Turf

BARENBRUG

Classic 100% fescue mix.

A traditional mixture containing only fine-leaved fescue species. Traditionally fescue grasses are the species of choice for high quality links and heathland golf fairways. However, they are often the choice when creating a high-quality lawn, due to their ability to create an exceptionally dense turf. Fescue species are renowned for their ability to tolerate dry conditions.

- Ryegrass-free mixture
- Low maintenance lawns, landscapes
- 100% fescue blend for a traditional fine turf
- Excellent appearance
- Very tolerant of drought conditions

In the bag

50%	BARCHIP	Chewings red fescue
40%	BARRISSE	Strong creeping red fescue
10%	MUSETTE	Slender creeping red fescue

Sowing rate: 25-35g per m²

Height of cut: Down to 8mm

Pack sizes: 10kg; 20kg

Barenbrug Essential: E8 - Shaded Areas

BARENBRUG

Keep your grass green, even when it is in the dark.

Contains a blend of species that will tolerate shaded conditions. Suitable for shaded lawns or general landscape areas with low light levels.

- Thrives in shade as well as areas of full sun
- Creates an attractive turf
- Tolerant of the dry conditions
- Ideal for sowing under new tree plantations
- Slow growing ryegrass

In the bag

25%	BARDORADO	Perennial ryegrass
25%	POLKA	Strong creeping red fescue
20%	MUSETTE	Slender creeping red fescue
20%	RIDU	Hard fescue
10%	BARCAMPISIA	Tufted Hairgrass

Sowing rate: 25-35g per m²

Height of cut: Down to 15mm

Pack sizes: 10kg; 20kg

Barenbrug Essential: E10 - Clay / Waterlogged Soils

BARENBRUG

Flood prone areas and waterlogged soils.

This mixture will tolerate wet soil conditions as well as short periods of flooding, as typically seen with Sustainable Drainage Systems (SuDS). The inclusion of deep-rooted tall fescue means that the mixture has excellent soil stabilisation properties.

- Ideal for Sustainable Drainage Systems (SuDS)
- Tolerant of extended periods of waterlogging
- Deep-rooting to stabilise soil
- Suitable for areas that are dry through summer and wet through winter
- Able to recover from short periods of flooding

In the bag

40%	Tall fescue
40%	Perennial ryegrass
20%	Strong creeping red fescue

Sowing rate: 30-40g per m²

Height of cut: Down to 25mm

Pack size: 20kg

*Seed mixes correct at time of going to press.

GROUND MAINTENANCE

GRASS SEED

Barenbrug Essential: E11 - Water Saver / Dry Soils

BARENBRUG

Dry soils, prone to drought, can rejoice.

The availability of water for irrigation is likely to be an increasing issue in the future. The E11 mixture utilises the most drought tolerant grass species suitable for the UK climate - tall fescue. Tall fescue has an exceptionally deep root system, which means it can access water that is unavailable to other species. Ideal for urban areas where water usage may be unavailable or restricted.

- Developed for drought prone soils
- Ideal for areas where water usage is restricted
- Contains tall fescue, the most drought tolerant species for the UK climate
- Excellent wear tolerance once established

In the bag

50%	Tall fescue
50%	Perennial ryegrass

Sowing rate: 35-50g per m²

Height of cut: Down to 25mm

Pack size: 20kg

Barenbrug Essential: E13 - Coastal Areas

BARENBRUG

Coastal lawns and landscapes - salt and drought tolerance.

The E13 mixture delivers salt and drought tolerance for lawns and green spaces in coastal areas. Coastal areas are often subjected to saline conditions and drought; the species in the E13 mixture have been selected to tolerate these conditions. As well as excellent salt and drought tolerance, the E13 mixture is also durable thanks to the inclusion of perennial ryegrass.

- Tolerant of drought conditions
- Includes species that are tolerant of saline conditions
- Contains deep rooted and drought tolerant species
- Good levels of wear tolerance

In the bag

30%	Perennial ryegrass
30%	Slender creeping red fescue
20%	Hard fescue
20%	Tall fescue

Sowing rate: 30-40g per m²

Height of cut: Down to 25mm

Pack size: 20kg

Barenbrug Essential: E15 - Road Verge

BARENBRUG

Official Department for Transport mixture.

The official grass seed mixture for road verges, as specified by the Department for Transport. Designed to give fast establishment, be tolerant of harsh conditions and grow in poor quality soils. The inclusion of white clover aids growth on impoverished soils. White clover is a legume which takes nitrogen from the air and returns it to the soil, providing a source of nutrients for the neighboring grass plants.

- Tolerant of drought and moderate salinity
- Fast to germinate and establish
- Tolerant of a wide range of soils

In the bag

40%	Strong creeping red fescue
25%	Perennial ryegrass
10%	Hard fescue
10%	Smooth-stalked meadowgrass
10%	Chewings red fescue
2.5%	Bentgrass
2.5%	White clover

Sowing rate: 10-20g per m²

Height of cut: Down to 75mm

Pack size: 20kg

*Seed mixes correct at time of going to press.

Our Jessica Bee's Wildflower Seeds are perfect for creating a wildflower zone in gardens, roadsides, verges and parks. Re-wilding urban and country areas with wildflower is helping restore Britain's depleted natural habitats.

It is estimated that around 95% of British wildflower meadows were lost after the Second World War – but thankfully, we are now seeing increased interest in native wildflowers. Improving and re-wilding open areas can make a visual difference, encourage nature and help meet the challenge of climate change. Wildflowers can provide habitat that has been lost for the creatures that desperately need it.

By managing our gardens, farms and other green spaces differently, we can make space for nature and help reverse biodiversity loss.

SUPERIOR ALUMINIUM LANDSCAPE EDGINGS

Rite Edge is a high quality and durable solution for lawn edging, garden edging, landscape edging and more. Rite Edge is manufactured from an Aircraft Grade Aluminum Alloy designed to last at least 27 years, so no painting, staining, rusting, or replacing to worry about.

RITE EDGE APPLICATIONS:

- Artificial Grass
- Tree Circle
- Flower Bed Landscape Bed
- Maintenance Strip

RITE L EDGE APPLICATIONS:

- Asphalt Surfaces
- Resin Bonded
- Sports Surface
- Green Roof
- Aggregate Walkway
- Safety Bound
- Brick Paver

GROUND MAINTENANCE

LAWN EDGING

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Rite Edge Lawn Edging

Rite Edge takes the back ache out of tidy border edges. Aluminium edgings don't rust or rot and are incredibly easy to install. Form curves, corners and straight edges with ease and they will last for years.

Ideal for plant bed, lawns, pathways, jogging trails, driveways, maintenance strips and many more!

- Enables clever designs, with sharp curves or neat straight lines
- Stakes lock into position for strong permanent positioning
- Lifetime maintenance free
- Manufactured in aluminium, which is strong, light and durable
- Will also not rust or cause corrosion in the edging
- Comes with pins
- Create a high-quality finish, lasting up to 30 years
- Save hours of maintenance work on maintaining crisp garden edges
- Save radically on your installation time and costs
- Sections slide together due to telescopic design, or flush joiners
- Rounded tops with no sharp edgings, making it safe for children

Available colours: Natural, Brown, Green, Black & Rust

20kg Handy Bags

Super Root Tree & Shrub Compost

Super Root is both a tree and shrub planting compost and a soil conditioner, it is a blend of sterilized mushroom compost and composted fine bark.

This blend is enriched with the controlled addition of essential minerals and nutrients to create a balanced product, able to rapidly aid the establishment of tree and shrubs by promoting early root growth. Recommended rate of use in planting pits is normally one part of Super Root to four parts of topsoil, this addition rate may be increased to 1:3 with very poor soils.

For general soil improvement a 50mm layer should be spread over the area to be treated, then forked or rotavated in.

SOILS, COMPOSTS & MULCHES

TOP SOIL, SOIL CONDITIONERS & MUSHROOM COMPOSTS

Peat Free Multi Purpose

Based on composted bark fines, composted wood fibre, organic compost and other peat free materials indigenous to the United Kingdom, together with coir, these media are suitable for potting and cuttings of most types of plant.

All components are from sustainable sources and avoid further depletion of peat resources.

Additives to enhance drainage, water retention and uptake can be added if required. Inorganic or organic fertilisers are added to give the desired balance of nutrients.

Mushroom Compost

This material is produced under carefully controlled conditions and is a by-product of the mushroom growing industry.

The basic ingredients of this compost are horse manure, poultry manure and wheat straw. Before collection from the mushroom farm, the compost is steam sterilised by the mushroom grower.

This guarantees that the compost will contain no pests, diseases or weed seed that would otherwise cause problems to the landscaper or gardener. The material is approximately neutral with a pH of 6.3 to 6.8. It is a first class soil conditioner for all types of soil.

Pack Sizes	Packs Per Pallet
Loose Loads	-

COMPOSTS

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Bloom & Gro Multi Purpose Compost

A consistent high quality compost with a nutrient enriched formula and wetting agent to ensure easier watering.

Used for bedding plants, potting, containers and hanging baskets.

Pack Size	Packs Per Pallet
80 Litre Bag	50

Bloom & Gro Ericaceous Compost

A special formula of compost for acid loving plants such as Rhododendrons, Azaleas, Camellias and Heathers.

Pack Size	Packs Per Pallet
80 Litre Bag	50

Clover Tree Planting & Mulching Compost

An economical tree planting and mulching compost. Formulated with trace elements and slow release fertiliser.

Promotes healthy plant growth.

Pack Size	Packs Per Pallet
80 Litre Bag	50

Clover Container Compost

Medium to coarse grade peat, open structured with optional grit. Contains wetting agent and base nutrient with trace elements.

Controlled release fertiliser and insecticides may be added to accommodate crop requirements. Suitable for nursery stock, shrubs and large pot plants.

Pack Size	Packs Per Pallet
80 Litre Bag	50

Clover Herbaceous Compost

A medium grade peat with added grit and bark, suitable for a wide range of herbaceous perennials.

Contains wetting agent and base nutrients. Controlled release fertilisers and insecticides are optional.

Pack Size	Packs Per Pallet
80 Litre Bag	50

Clover Tub & Basket Compost

Medium grade peat with high nutrient. Moisture retaining granules added to reduce watering.

For Hanging Baskets. Tubs and Planters.

Pack Size	Packs Per Pallet
80 Litre Bag	50

SOILS, COMPOSTS & MULCHES

COMPOSTS

Klasmann Container Substrate

Blend of white sphagnum peat and frozen through black sphagnum peat, water soluble fertiliser plus trace elements added.

For growing on trees, conifers and shrubs in 2 Litre containers and above.

Pack Sizes	Packs Per Pallet

SylvaGrow® Multi Purpose Compost

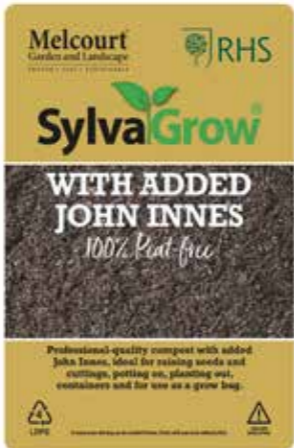

A unique blend of fine bark, woodfibre and coir.

Contains balanced nutrients sufficient for the first 4 - 6 weeks of growth. This growing medium is based on one widely used throughout the UK by professional growers and is suitable for a wide range of uses. Contains no peat or green waste compost.

Pack Size	Packs Per Pallet
50 Litre Bag	60

SylvaGrow® Multi Purpose John Innes Compost

A unique blend of fine bark, woodfibre and coir, with added sterilised loam and silver sand.

Contains balanced nutrients sufficient for the first 4 - 6 weeks of growth. This growing medium is based on one widely used throughout the UK by professional growers and is suitable for a wide range of uses. Contains no peat or green waste compost.

Pack Size	Packs Per Pallet
50 Litre Bag	60

SylvaGrow® Ericaceous Compost

A unique blend of fine bark, woodfibre and coir.

SylvaGrow® Ericaceous contains balanced nutrients sufficient for the first 4 - 6 weeks of growth. 100% peat-free ericaceous compost is ideal for growing blueberries, rhododendrons, azaleas, heathers, camellias and other lime-hating plants in tubs and containers and for planting out.

Pack Size	Packs Per Pallet
50 Litre Bag	60

SylvaGrow® Organic

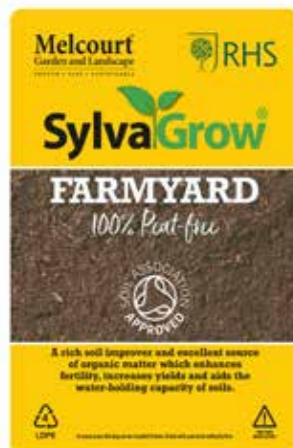

SylvaGrow® Organic is a unique blend of fine bark (a by-product of sustainably managed British forests), green compost (a carefully-sourced, certified ingredient) and coir (from known, ethically-approved sources).

Pack Size	Packs Per Pallet
50 Litre Bag	60

SylvaGrow® Farmacyard Compost

SylvaGrow® Farmacyard is an excellent soil improver which provides gardeners with a 100% peat-free, rich source of organic matter for all soils.

Adding nutrients, improving fertility and yields, enhancing soil structure and workability and increasing water-holding capacity.

Pack Size	Packs Per Pallet
50 Litre Bag	60

SylvaGrow® Tub & Basket Compost

Use for a wide range of plants including bedding, tomatoes, strawberries, peppers, herbs, fruit, shrubs and perennials.

Contains a water-retaining aid to give the compost greater resilience against drying out.

Pack Size	Packs Per Pallet
50 Litre Bag	60

Sharp Sand

Horticultural grade lime-free washed quartzite sharp sand.

Nominal 3mm down.
Uses: Seed and cutting composts, top dressing, laying paving slabs, mortar and plaster.

Available Pack Size
Loose Loads

DECORATIVE AGGREGATES

GRAVEL & PEBBLES

Available pack sizes: Loose Loads, Bulk Bags, 20kg Handy Bags

Black Basalt

A modern contemporary stone for your garden. Black when wet, charcoal grey when dry.

Size Range: 10 - 20mm

Black Ice

Contemporary marble chippings, in striking shades of dark greys, greys, blues and whites.

Size Range: 20mm

Blossom

Stunning, durable marble chippings, in striking shades of rose pinks, greys and whites.

Size Range: 20mm

Yorkshire Cream

A beautiful gravel ideal for footpaths and driveways. Also known as Cotters Gold.

Size Range: 10 - 20mm

Dove Grey Limestone

Provides a cost-effective solution for driveways and longer paths and landscaping projects.

Size Range: 10 - 20mm

Golden Gravel

Great for driveways and footpaths, landscaping and rockeries, ponds and water features.

Size Range: 10 - 20mm

Gravel

A very durable, multi-coloured, rounded quartz gravel.

Size Range: 20mm

Nordic Granite

A durable angular product with a green/black/grey appearance with a hint of white and pink.

Size Range: 20mm

Pea Gravel

Perfect in any garden, but is also used in drainage schemes by landscapers.

Size Range: 10mm

Scottish Red Granite

The strength of this stone guarantees it will withstand both pedestrian and vehicular traffic.

Size Range: 14mm

DECORATIVE AGGREGATES

COBBLES & SLATE

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Available pack sizes: Loose Loads, Bulk Bags, 20kg Handy Bags

Scottish Pebbles

These small Scottish Pebbles have soft rounded edges making them the perfect stones for garden water features, they have subtle shades when dry and a more striking appearance when wet.

Size Range:

14 - 20mm

20 - 30mm

Scottish Cobbles

Decorative pebbles and cobbles can provide that finishing touch to your outside space. Perfect in partnership with our Scottish Pebbles.

Size Range:

30 - 50mm

50 - 80mm

80 - 120mm

120 - 200mm

200 - 300mm

Blue Slate

Adding blue slate to the landscape can provide a distinctive look.

Slate is perfect for use as mulch around plants in a border or to top off containers.

Size Range:

10 - 30mm

40mm

Plum Slate

One of our most popular slate colours - plum slate adds colour to large areas and the flat surfaces mean that walking on slate isn't as uncomfortable as you may think.

Plum slate works well in landscapes and gardens that are either full of colour, or predominantly foliage led, adding contrast to green.

Size Range:

10 - 30mm

40mm

Sportsmaster® Pre-Seeder 8-12-8+3MgO

The high phosphorus levels in Sportsmaster® Pre-Seeder enhances seed establishment and to improve rooting.

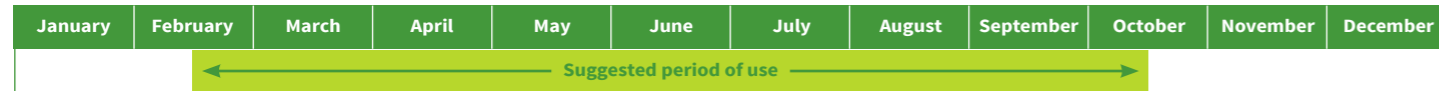

- Ideal for use prior to seeding/over-seeding or laying turf
- High phosphorous analysis to enhance seed establishment and better rooting.

Characteristics

Granule size (mm)	0.5 - 3.35mm
Pack size	25kg
Pack coverage	500 - 833m ²
Application rate	30 - 50g/m ²
Granule dispersal	4-5 days
Longevity	6 weeks
Turf response	<7 days

Analysis

Nitrogen Total (N)	8%
Phosphorus Pentoxide (P ₂ O ₅)	12%
Potassium Oxide (K ₂ O)	8%
Magnesium Oxide (MgO)	3%

Sportsmaster® Autumn 4-12-12

Sportsmaster® Autumn is ideally used to strengthen turf in autumn or when turf needs pre-stress conditioning.

- Perfect for pre-stress conditioning or at the end of the summer
- Helps to deliver correct root growth prior to winter
- Hardens the turf for winter's wear and tear

Characteristics

Granule size (mm)	0.5 - 3.35mm
Pack size	25kg
Pack coverage	357 - 714m ²
Application rate	35 - 70 g/m ²
Granule dispersal	4-5 days
Longevity	6 weeks
Turf response	<7 days

Analysis

Nitrogen Total (N)	4%
Phosphorus Pentoxide (P ₂ O ₅)	12%
Potassium Oxide (K ₂ O)	12%

Sportsmaster® Spring & Summer 9-7-7

Sportsmaster® Spring & Summer is an all-rounder that breaks down quickly to give rapid uptake of nutrients.

- For use anytime between beginning of spring and end of summer
- Breaks down quickly for uptake of nutrients
- Lowers the risk of scorching

Characteristics

Granule size (mm)	0.5 - 3.35mm
Pack size	25kg
Pack coverage	357 - 714m ²
Application rate	35 - 70g/m ²
Granule dispersal	4 - 5 days
Longevity	6 weeks
Turf response	<7 days

Analysis

Nitrogen Total (N)	9%
Phosphorus Pentoxide (P ₂ O ₅)	7%
Potassium Oxide (K ₂ O)	7%

Sportsmaster® Renovator Pro 14-0-5+Fe+MCPA+Mecoprop-P

Sportsmaster® Renovator Pro is a weed, feed and mosskiller that maintains growth and contains a selective herbicide for weed control plus iron for moss control.

- Ideal during spring and summer period when broadleaved weeds are present and need controlling in one application.
- Contains selective herbicide for routine and heavy weed control
- Contains iron for moss control

Characteristics

Granule size (mm)	0.5 - 2.5mm
Pack size	25kg
Pack coverage	714m ²
Application rate	35 g/m ²
Granule dispersal	4-5 days
Longevity	6 weeks
Turf response	<7 days

Analysis

Landscaper Pro® Triple Action

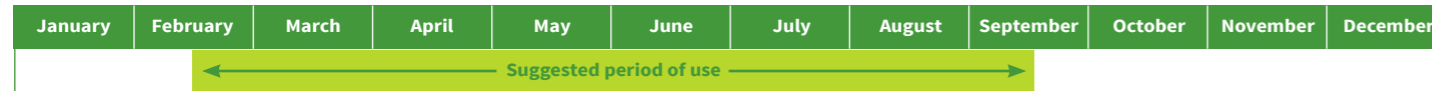

All-in-one granular weed, feed and mosskiller. Maintains growth and contains a selective herbicide for weed control plus iron for moss control.

- Value for money
- High nutrient content so less fertiliser is required
- Optimal delivery of nutrients for enhanced turf quality
- Encourages strong root system for health and resilience

Characteristics

Granule size	1mm - 2.5mm
Pack size	15kg
Pack coverage	428m ²
Application rate	35 g/m ²
Granule dispersal	8 days
Longevity	6 weeks
Turf response	7 days

Landscaper Pro® Autumn & Winter

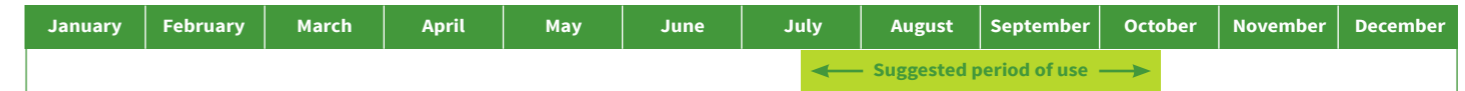

Application results in a slow steady growth that helps to prevent stress during cold winter months.

- Value for money
- High nutrient content so less fertiliser is required
- Optimal delivery of nutrients for enhanced turf quality
- Encourages strong root system for health and resilience

Characteristics

Granule size	1mm - 2.5mm
Pack size	15kg
Pack coverage	428 - 600m ²
Application rate	25 - 35 g/m ²
Granule dispersal	8 days
Longevity	2 - 3 months
Turf response	7 days

Landscaper Pro® Spring & Summer

A high impact fertiliser with controlled release technology formulated to give a strong immediate response, combined with up to 3 months longevity.

- Value for money
- High nutrient content so less fertiliser is required
- Optimal delivery of nutrients for enhanced turf quality
- Encourages strong root system for health and resilience

Characteristics

Granule size	1mm - 2.5mm
Pack size	15kg
Pack coverage	430 - 600m ²
Application rate	25 - 35 g/m ²
Granule dispersal	8 days
Longevity	2 - 3 months
Turf response	7 days

Landscaper Pro® Universtar Balance

Developed as a convenient and cost-effective general purpose fertiliser for use on lawns, beds and borders.

- Value for money
- High nutrient content so less fertiliser is required
- Optimal delivery of nutrients for enhanced turf quality
- Encourages strong root system for health and resilience

Characteristics

Granule size	1mm - 2.5mm
Pack size	25kg
Pack coverage	714 - 1,000m ²
Application rate	25 - 35 g/m ²
Granule dispersal	8 days
Longevity	2 - 3 months
Turf response	7 days

APPROVED DISTRIBUTOR

ICL offer a wide range of high quality fertilisers, plant protection products, growing media, wetting agents and biostimulants.

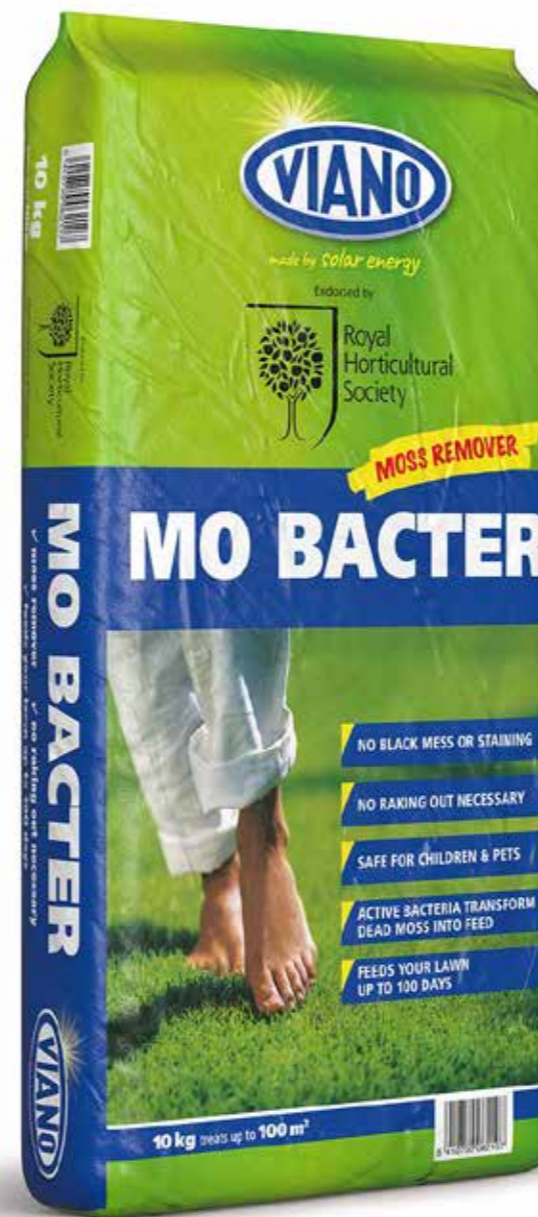

Professional Horticulture - for all your ornamental crop needs.

Turf and Landscape - Innovative solutions for turf grass and amenity areas.

MO BACTER

MOSS REMOVER

Mo Bacter 5-5-20+3MgO

MO Bacter is an organic-based slow-release granular fertiliser which will feed your lawn for 100 days, destroys moss without turning it black and removes the need of raking out the dead moss.

MO Bacter applies essential nutrients to the lawn including an extra dose of potassium which moss can't tolerate. The moss dies off as a result of potassium overdose while the strength of grass is improved.

Within 3-4 weeks of application, under ideal conditions, the moss turns brown. A short time afterwards the dead moss will start to disappear as the beneficial bacteria in MO Bacter is digesting the dead material.

The slow-release granules continue to feed the lawn for up to 100 days.

- Organic based
- Indirect action against moss
- Destroys moss with no black debris
- No raking out necessary
- No staining on hard surfaces
- Safe to children and pets
- Feeds your lawn for up to 100 days
- Will not harm desirable plants
- Best results at >12°C with active growth
- Approved by the Royal Horticultural Society

Characteristics

Pack size	20kg
Pack coverage	200m ²
Application rate	100-150 g/m ²
Longevity	3 months

Thomas Elliot Blood, Fish & Bone 5-5-6

Blood, Fish & Bone is a traditional organic based general purpose fertiliser that contains all 3 major nutrients for healthy and strong plant growth.

- Nitrogen, encourages healthy foliage
- Phosphorous, to develop the plants root system
- Potassium, to promote flowering and ripening of fruit

Characteristics		Analysis	
Granule size	2mm - 4mm	Nitrogen Total (N)	5%
Pack size	25kg	Phosphorus Pentoxide (P ₂ O ₅)	5%
Application rate	35 - 50 g/m ²	Potassium Oxide (K ₂ O)	6%
Longevity	6-8 weeks	Magnesium Oxide (Mg ₂)	

Thomas Elliot Growmore 7-7-7

Traditional granular fertiliser with balanced proportions, making it an ideal source of nutrients for all round plant production. Used as either a base or top-dressing will stimulate growth in all plants, encouraging fruiting, flowering, abundant foliage and strong healthy roots.

- Can be applied throughout the growing season
- Growmore can be used for growing fruits, vegetables and flowers
- Ideal fertiliser on garden lawns if laying new turf or sowing in grass seed

Characteristics		Analysis	
Granule size	2mm - 4mm	Nitrogen Total (N)	7%
Pack size	25kg	Phosphorus Pentoxide (P ₂ O ₅)	7%
Application rate	35 - 50 g/m ²	Potassium Oxide (K ₂ O)	7%
Longevity	8 - 10 weeks	Magnesium Oxide (Mg ₂)	

Thomas Elliot Organic Bonemeal 3.5-18-0

Bonemeal is an organic fertiliser ideal for plant nutrition without explosive, rapid growth. Bonemeal contains a natural source of phosphate which is vital for young plants and is slow-released. Suited for use on shrubs, roses and other general garden plants during planting and seeding, as well as tree planting to encourage good root development.

- Provides organic plant nutrition without rapid, explosive growth
- Contains high levels of naturally sourced phosphate- ideal for phosphate hungry plants such as roses
- Ideal for young plants / trees just getting established

Characteristics		Analysis	
Granule size	2mm - 4mm	Nitrogen Total (N)	3.5%
Pack size	25kg	Phosphorus Pentoxide (P ₂ O ₅)	18%
Application rate	70 - 140 g/m ²	Potassium Oxide (K ₂ O)	
Longevity	4 - 6 weeks	Magnesium Oxide (Mg ₂)

Greenmaster® Liquid High N 25-0-0+2MgO+TE

Greenmaster® Liquid High N has a mixed Nitrogen source to ensure maximum plant uptake. A full trace element package improves overall turf health and stress recovery. It is also equipped with Magnesium to enhance turf colour.

- High Nitrogen content for quick initial effect
- Mixed Nitrogen source for optimal plant uptake
- Full trace element package
- Improves turf health and stress recovery
- Magnesium content for better colour
- Great tank-mix additive to raise Nitrogen levels
- Encourages strong root system for health and resilience

Characteristics

Pack size	10L & 200L
Pack coverage	833 - 2,500m ²
Application rate	40 - 120 L/ha
Product dispersal	Immediate
Longevity	4 weeks
Turf response	<24 hrs

Analysis

Greenmaster® Liquid High K 3-3-10+TE

Greenmaster® Liquid High K can be used before or during stressful conditions. The low Nitrogen and Phosphorous levels maintain low growth and promote good rooting. Greenmaster® Liquid High K unlocks any Iron trapped in the soil, enhancing turf health and colour. It is equipped with a full trace element package which also improves turf health and assists in stress recovery.

- Ideal to apply before stressful conditions
- Low Nitrogen and Phosphorous retain low growth and good rooting
- Unlocks Iron, enhancing health and colour
- Full trace element package aids stress recovery

Characteristics

Pack size	10L & 200L
Pack coverage	833 - 2,500m ²
Application rate	40 - 120 L/ha
Product dispersal	Immediate
Longevity	4 weeks
Turf response	<24 hrs

Greenmaster® Liquid Spring & Summer 12-4-6+TE

Greenmaster® Liquid Spring & Summer is ideal to use during main growing periods. It has a complete NPK formula to allow feeding during the main growing season with no excess growth. Also replenishes nutrients lost in grass clippings and unlocks Iron trapped in the soil, enhancing color and health. A full trace element package improves overall turf health and stress recovery.

- Perfect for main growth periods
- Complete NPK formula for main season feeding
- Full trace element package
- No excess growth, unlocks Iron in soil for better color / health
- Replenishes nutrients lost in grass clippings
- Improves stress recovery

Characteristics

Pack size	10L & 200L

FERTILISERS & SOIL CONDITIONERS

LIQUID BIOSTIMULANT

Basfoliar® Kelp SL

Derived from kelp extract (*Ecklonia maxima*). This biostimulant is a natural extract of the brown algae *Ecklonia maxima*, containing natural beneficial substances, proteins and amino acids for enhanced root growth, plant establishment and stress relief.

- Extract obtained through gentle mechanical extraction from fresh seaweeds
- High contents of beneficial substances, such as amino acids, proteins, carbohydrates and vitamins
- Vitalizes and promotes plant growth and root formation
- Increases yield, quality and resistance to abiotic stress factors

Pack Size

10 Litre

Basfoliar® Aktiv SL

A liquid NK fertiliser with the complete range of micronutrients. As a promoter of root growth and a quality enhancer it also contains natural seaweed extract derived from *Ecklonia maxima*. Basfoliar® Aktiv SL can be applied either via foliar spraying or fertigation.

- Special formulation for stimulating shoot and root growth and strengthening the plants' natural defences
- Biostimulating effect thanks to the seaweed extract from *Ecklonia maxima*
- Quick and efficient effects via roots and leaves

Pack Size

10 Litre

BioStim HF

Beneficial soil organisms lack the ability to photosynthesise and capture energy from the sun. They therefore have to survive on residual carbon substances in the soil. BioStim HF is therefore a good source of energy for all the beneficial soil organisms providing the carbon energy and many mineral requirements for soil micro organisms as a substitute for photosynthesis.

- Stimulates early growth (soil temperature above 5°C)
- Increases the permeability of cell-membranes in the roots which increases nutrient uptake
- Promotes the development of chlorophyll, sugars and amino acids in the plant
- Stimulates plant growth by accelerating cell division and increasing the rate of development in root systems
- Reduces leaching of water soluble inorganic fertilisers and retains it in the root zone (especially nitrates)
- Acts as a natural chelator and increases nutrient availability for plants.
- Improves the soil structure and the water holding capacity (aids colloids to combine)
- Enhances the plant's natural resistance against diseases and pests
- Decreases high salt content in soils and thus the resulting toxicities

Pack Size Application rate

1 Litre 1lt / Ha

BLACK PINE BEETLE & LARGE PINE WEEVIL CONTROL

Gazelle SG Insecticide

A broad spectrum neonicotinyl insecticide containing (20% w/w) acetamiprid for on label control of aphid and whitefly species. Has additional activity on plant chewing and sucking pests such as: thrips, leafminers (specific species), leafhoppers, mealybugs, beetles and weevils (Black Pine Beetle & Large Pine Weevil), leafmidge, scale insects, fly species (e.g. cherry, sawfly and sciarid)

- Quick knockdown aphicide with highly systemic contact and translaminar activity

Pack Size Active Ingredient Coverage Mapp No.

500g Acetamiprid 20% 10,000 - 15,000m² 13725

CHEMICALS

TOTAL & RESIDUAL HERBICIDES

Credit® 540

Systemic foliar herbicide effective against most annual or perennial weeds.

- Suitable for tree stump treatment
- A fresh approach from the use of glyphosate

Pack Size	Active Ingredient	Application Rate	Water Rate
5 Litres	540g/l Glyphosate	5 - 10lt / Ha	80 - 250lt / Ha

Paradise®

Paradise® is a long lasting non-selective total weed killer that is used for pre and post emergent control of a wide variety of weeds in porous surfaces, when used at the correct rate it will control most annual and perennial weeds for upto 6 months. For best results mix Paradise® with a total weedkiller glyphosate based product . This will kill the weeds which are present at application and also lay a residual barrier which will prevent any future germination and leave the treated area weed free for an extended period of time.

- Long-lasting total herbicide
- Controls a wide range of annual and perennial weeds for up to 6 months
- Ideal for paths, fence-lines and gravelled areas

Pack Size	Active Ingredient	Application Rate	Water Rate
50g / 150g	Flazasulfuron	150g / Ha	2500 - 600lt / Ha

CHEMICALS

TOTAL & RESIDUAL HERBICIDES

Monsanto Amenity XL Glyphosate

Monsanto Amenity Glyphosate XL is a clean label glyphosate formulation designed to provide cost effective control of emerged weeds in industrial and amenity situations, as well as forestry and on hard surfaces.

- Powerful surfactant for incredible performance
- Controls many emergent weeds
- Rain-fast in just four hours
- Quickly breaks down in the soil after application
- Ideal to use between early spring and late summer

Pack Size	Active Ingredient	Application Rate	Water Rate
5 Litres	360g/l Glyphosate	5 - 10lt / Ha	80 - 250lt / Ha

Roundup® ProVantage

Roundup ProVantage is a professional, non-selective weed killer concentrate targeting annual and perennial grasses and broadleaved weeds as well as more resilient invasive plants such as Japanese Knotweed. Roundup ProVantage is a non-selective weed killer that must be diluted in water before it may be used. Dilute 20ml of the concentrate per 1 litre of water. Most effective when used in conjunction with a sprayer.

- Rainfast in 1 hour for annuals and 4 hours for perennials
- Ensures the maximum amount of glyphosate gets to the roots
- Reduces risk of damage to neighboring plants

Pack Size	Active Ingredient	Application Rate	Water Rate
5 Litres	480g/l Glyphosate	2.25 - 7.5lt / Ha	80 - 250lt / Ha

Roundup® ProActive

Roundup Monsanto ProActive is a strong weed killer with a patented formulation containing 360g/l of glyphosate. The optimised formula delivers highly efficient activity which ensures fast-acting and effective results on any weeds its applied to, with signs of decay appear after just 10 days as the solution works its way through the plant right to the roots, killing it completely.

- Rainfast in 1 hour for annuals and 4 hours for perennials
- Ensures the maximum amount of glyphosate gets to the roots
- Superior performance in challenging conditions
- Less risk of drift
- Reduces risk of damage to neighboring plants

Pack Size	Active Ingredient	Application Rate	Water Rate
5 Litres	360g/l Glyphosate	3 - 5lt / Ha	80 - 250lt / Ha

Nothing gets to grips with weeds like Icade

ECOPLUG®MAX

An effective tree stump treatment which contains granular glyphosate that kills the whole root system of targeted trees with no effect on the surrounding area. Ecoplugs can be used at any time of the year and in any weather conditions, since the plugs are sealed into the stump preventing any herbicide movement outside the stump.

- 95 - 100% efficacy on treated stumps, preventing regrowth
- 100% selective with no effect on surrounding trees or vegetation
- Extends the interval between clearings compared with cutting alone
- Effective on a wide range of tree species
- Reduces the risks of operator contact with chemical
- No risk of damage to surrounding trees and vegetation
- Reduces the risk of chemical wash off or spillage
- No risk of over dosing
- Supports the requirements of the Sustainable Use Directive to minimise herbicide use
- Supports the requirements of the Water Framework Directive to prevent contamination of waterways with pesticides

Pack Size **Active Ingredient**

100 x 300mg Glyphosate

The **residual,**
pre-emergent total
herbicide for vegetation
management

ProShield®

ProShield® is non-selective herbicide for control of annual and perennial weeds on natural surfaces not intended to bear vegetation, permeable surfaces overlaying soil, and hard surfaces. Not only will it control weeds and grasses that are present it will also keep weeds away for a longer period by stopping future re-growth.

- A fast acting weed killer, with rapid knockdown and kill, plus an added barrier that prevents weed germination for up to 6 months
- Rainfast within 1 hour
- Can be used on gravel and soft surfaces
- Fast acting due to the synergistic effect of two potent active ingredients

Pack Size	Active Ingredient	Application Rate	Water Rate
5 Litres	Glyphosate/Diflufenican	4.5lt / Ha	200 - 500lt / Ha

Praxys®

Praxys® is a high performance, highly concentrated systemic weedkiller.

- Selective, systemic post-emergence herbicide
- Combines three powerful herbicides
- 1 application per year kills to the roots
- Long application window
- Rainfast within 1 hour
- Low dose rates
- Rapid entry into weeds

Pack Size	Active Ingredients	Application Rate	Water Rate
2 litres	Florasulam/Fluroxypyr	2lt / Ha	200lt / Ha

Lockstar®

LockStar® helps keep amenity and landscape areas weed-free, functional and visually pleasing. With an innovative, long-lasting formula, it allows professional and safe weed control. Developed for use by local authorities, councils, highway maintenance, vegetation management contractors and landscapers.

- A total, residual, pre-emergent herbicide
- Contains an innovative new active ingredient
- Controls a broad spectrum of weeds
- Residual effect for up to 4 months
- Can be tank-mixed with glyphosate or fatty acids for post-emergent control

Pack Size	Active Ingredient	Application Rate	Water Rate
500g	Lodosulfuron	500g / Ha	300 - 500lt / Ha

Algae Clean 610 Pro

A highly concentrated hard surface cleaner for the removal of algae growths on hard surfaces and artificial pitches. Algae Clean 610 Pro will also treat lichen, liverwort, slimes, mould and fungi.

- Highly concentrated
- Low application rates

Pack Size	Pack Coverage
5 Litres	2000 - 4000m ²

MMC-Pro

MMC-PRO is a dynamic broad-spectrum anti-viral and anti-bacterial algacide and disinfectant, creating a long lasting moss-free surface. A high performance and versatile large-scale outdoor hard-surface cleaner.

- PH-neutral and non-corrosive
- Easy and effective to use
- Readily biodegradable
- Contains no bleach or acids
- Wide range of outdoor hard surfaces

Pack Size	Pack Coverage
5 Litres	2000 - 4000m ²

Creating a long lasting algae, mould and moss-free surface.

CHEMICAL APPLICATION

STEM INJECTOR & SPRAYERS

Stem Injector Kit

InjectorDos Pro is an injection applicator with the facility to 'dial-in' a pre-determined metered volume of spray liquid to be dispensed. The InjectorDos Pro is suitable for injecting herbicide into the stem of weeds with hollow stems such as Japanese Knotweed, Giant Hogweed and Horsetail. The InjectorDos Pro offers a safe and effective means of treating weeds in places adjoined by sensitive areas (e.g. close to watercourses) or where adjacent foliage needs to be preserved and a spraying applicator is unsuitable.

- Lightweight and easy to use
- Safe and effective
- No loss of product to the environment
- Adjustable metered dose - 0.1 to 2ml/shot
- Simple cleaning and maintenance
- Chemical resistant seals
- Hand operated
- 1 litre backpack c/w shoulder strap and funnel

Weight	Weight Empty	Volume per shot	Total Capacity
1475g	475g	0.1 - 2ml	1 Litre

KS16 General Purpose Knapsack 16L

KS16 is a general purpose, lever-operated knapsack sprayer suitable for a wide range of agricultural and horticultural applications.

- Robust and easy to maintain
- Competitively priced
- Supplied with a range of nozzles to suit most spraying operations
- Chemical resistant seals
- Comfortable adjustable shoulder straps

Capacity	Weight Empty
16 Litres	3.2kg

CHEMICAL APPLICATION

SPRAYERS

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

SPRAYING SPECIALISTS SINCE 1895

Reinforced back support

- No direct contact with the tank for improved comfort

Adjustable straps with reinforced foam and tensioners

- Adjusts to the user's body shape
- Protects the user's shoulders

Adjustable waist strap and reinforced back

- Sprayer weight distribution : 70% on the hips / 30% on the shoulders
- Ensures sprayer stability

Chest strap

- Sprayer weight distribution : 70% on the hips / 30% on the shoulders
- Ensures sprayer stability

Berthoud General Purpose Knapsack 16L

A unique concept, exceptional carrying comfort, high performance diaphragm and curvilinear piston pump for quick pressurisation and low pumping frequency.

- Viton seals for use with aggressive products.
- Up to 5 bars pressure, with a pressure regulator for treating at the right pressure
- 1.2m telescopic lance to treat closer to the target
- Adjustable nozzle holder
- Quick and easy to disassemble

Capacity	Weight Empty
16 litres	5.9kg

CP COOPER PEGLER

SPRAYING TECHNOLOGY

PROFESSIONAL SPRAYERS

Cooper Pegler CP15 Evolution 15L

The backpack pump sprayer CP15 Evolution can now be equipped with a revolutionary new ergonomic carrying system with ultra-comfortable shoulder straps and waist belt to work better and longer. It is also fitted with two handles on the tank to for easy handling.

Its unique membrane pump system ensures a long life for the equipment and maximum convenience in spraying thanks to its flexible pumping.

Capacity	Weight Empty	Lance Length	Hose Length
15 Litres	4.75kg	500mm	1140mm

Cooper Pegler CP3 Evolution 20L

The 20 litre capacity of this knapsack sprayer CP 3 Evolution provides greater work autonomy and improved comfort thanks to its two carrying handles.

Its unique diaphragm pump system ensures the longevity of the sprayer as well as an adequate and precise protection for your crops. The 20 litre knapsack sprayer built-in pressure relief valve guarantee precision on the type of application desired.

Capacity	Weight Empty	Lance Length	Hose Length
20 Litres	4.95kg	500mm	1360mm

BIOLOGICAL CONTROL

BIOLOGICAL TREATMENT

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

Sportnem-H

Use Sportnem-H for biological control of chafer grubs in lawns (Scarabeidae larvae) and true weevils or snout beetles in lawns (Curculionidae larvae).

- Each box contains larvae (third stage) in gel
- Each bag contains 250 million larvae

Chafer grubs: May-October

Weevils: February - June

Pack Size	Pack Coverage	Solution
10 Bags	5000m ²	One box for at least 5000 litres of liquid

Sportnem-T

Use Sportnem-T for biological control of larvae of Tipulidae (crane flies), Noctuidae (owlet moths), Gryllotalpa (mole crickets) and various other species.

- Each box contains larvae (third stage) in gel
- Each bag contains 250 million larvae

Crane fly larvae: July - October

Noctuidae: February - June

Mole crickets: April - September

Pack Size	Pack Coverage	Solution
10 Bags	5000m ²	One box for at least 5000 litres of liquid

Seeka

Fast and effective natural control of Vine Weevil.

Vine Weevil Seeka, powered by BASF technology, is based on the beneficial nematode *Heterorhabditis bacteriophora* (82%) and an inert carrier with water (18%). It provides control of black vine weevil larvae (*Otiorhynchus Sulcatus*) present in soil or container-grown crops.

- Fast and effective natural control
- Control achieved at all times when the pest larvae are active
- No pest resistance problems

Pack Size	Application Rate	Water Rate
50 & 250	3 - 5lt / Ha	80 - 250lt / Ha

CAN'T FIND WHAT YOU ARE LOOKING FOR? CALL US ON 01904 608157

RootRain Urban

The RootRain Urban is a large capacity irrigation system with a fixed grid inlet, particularly suited to open space and roadside verge tree planting in softscape.

The grid allows water and air through but prevents ingress of litter and debris. The RootRain Urban is particularly suited to roadside verge and open space tree planting. The inlets are trimmer resistant and can be set below mowing machine height. They have very little vandal appeal and no theft value, making them ideal for housing estates and public areas.

- Large capacity 60mm irrigation system
- Grid lid prevents debris and rodent ingress
- Durable recycled materials

Lengths	Diameter	Inlet
10, 16.5 or 26ft	60mm	80mm

RootRain Civic

RootRain Civic is a large capacity irrigation system with a fixed grid inlet complete with a vandal resistant powder-coated aluminium cap on a retainer chain.

Like the RootRain Urban, it is suited for open space and roadside verge tree planting in softscape. RootRain Civic is a very well-proven large capacity irrigation system which has a vandal resistant inlet with a powder-coated aluminium cap on a retainer chain. Popular with landscape architects and contractors.

- Grid lid prevents debris and rodent ingress.
- Vented aluminium cap on retainer chain.
- Durable recycled materials.

Lengths	Diameter	Inlet
10, 16.5 or 26ft	60mm	95mm

RootRain Metro

Developed in the early 1990s, the RootRain Metro system is one of the most widely specified proprietary tree pit irrigation systems in the world.

A smaller (35mm) capacity irrigation system for trees in soft landscapes. Available in plastic or metal with cap and or chain in a variety of lengths (rootball dependant) for discreet irrigation.

- Durable 35mm perforated pipe in a variety of length options
- Caps to prevent silting, keep debris and rodents out
- Robust Metro bracket for ease of installation
- Variety of cap / chain options

Lengths	Rootball Diameters
4, 6 or 8ft	0.4, 0.55 or 0.8m

RootRain Precinct

RootRain Precinct 100 irrigation and aeration system maintains long term soil health and fertility by facilitating high volumes of water and nutrients such as oxygen to reach the tree rooting area directly, and allowing toxic gasses to escape.

This is critical for trees for, without water and aeration, soil beneath paved areas will quickly become anaerobic and unable to support the life of the tree.

- Heavy-duty aluminium inlet withstands high loads inc. street sweepers
- Lid lifts and swings to one side for fast irrigation & maintenance
- Flush finish ensures no trip hazard
- Unique integral self-cleaning mechanism

Length	Diameter	No of Inlets
10, 16.5 or 26ft	60mm	1 or 2 (110mm)

RootRain Hydrogrille

RootRain Hydrogrille tree aeration system maintains long term soil health and fertility by facilitating high volumes of water and oxygen to reach the tree rooting area directly.

- Heavy cast LM6 grade aluminium inlet – withstands high loads inc. street sweepers
- Lid lifts and swings to one side for fast irrigation & maintenance
- Flush finish ensures no trip hazard
- Inlet twistlocks into GreenBlue Urban's range of tree grilles

Please contact East Riding Horticulture to enquire about the range of Tree Grilles available.

Length	Diameter	Inlet
10, 16.5 or 26ft	60mm	120mm

Tricoflex Hose Pipe

For when only the 'best' will do this, flexible and robust hose is perfect for landscaping and domestic use.

- Robust, flexible, anti-kink hose
- Soft & Flex™ technology, provides superb kink resistance
- Weather proof with UV and frost protection
- Free from Phthalates, heavy metals and harmful toxins

Available Lengths	Diameters
15, 20, 25, 30 or 50m	12.5, 15, 19, 25, 30mm

EQUIPMENT & TOOLS

RAKES

Chelwood Rake - Hay Rake 16P

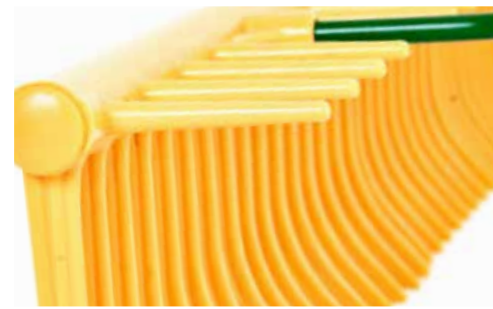

A replica of the original hay rake only lighter, stronger and more flexible usage.

Can be used for soil, gravel, grass and leaves. Comes with a back edge for accurate levelling and grading, particularly useful when preparing to lay new turf.

Short tooth version available (ST)

Width	No of Teeth	Tooth Gap	Head	Handle
650mm	16	30mm	Polypropylene	150cm Hardwood

Chelwood Rake - 32P

This rake has curved teeth and a set of secondary teeth that run at 90 degrees from the top of the teeth, allowing easier collection and removal of wet leaves and grass.

Also available: 48P - 350mm wider than the 32P

Width	No of Teeth	Tooth Gap	Head	Handle
650mm	32	20mm	Polypropylene	150cm Hardwood

Chelwood Rake - 18A

Straight tooth and back edge blade. Made from highest quality aluminium, this is the most lightweight and robust aluminium rake on the market.

This strong and versatile aluminium rake is designed for extensive use, particularly by groundsman responsible for preparing large flower beds and levelling extensive gravel pathways in parks and public/private gardens.

Width	No of Teeth	Tooth Gap	Head	Handle
660mm	18	30mm	Aluminum	180cm Hardwood

Chelwood Rake - The Land Scraper 18E

Wide, tough rake with high tensile teeth and back edge for grading and levelling. Also known as 'The Land Scraper' featuring an additional back edge/blade for grading and leveling.

Also available: 18S - Shorter teeth, course rake.

Width	No of Teeth	Tooth Gap	Head	Handle
700mm	18	40mm	Polypropylene	180cm Hardwood

Bulldog Wizard Rubber Rake

The rubber tines on this rake allow leaves and debris to be collected from any surface without causing disruption. It will collect leaves from grass or a gravel drive. Great for picking up leaves from a wet patio.

Specially designed rubber fingers cause no surface damage to sensitive areas such as bowling greens and lawns. Works well on patios, paths and driveways as they do not scratch or scrape the surface.

Width	No of Teeth	Tooth Gap	Head	Handle
510mm	20	30mm	Polypropylene	135cm Hardwood

Bulldog Leaf Rake

The Bulldog Plastic Leaf Rake is for general garden duties. Its strong plastic tines are cranked at the end for better collection of materials. It has a wide plastic head and a strong ash shaft.

The ideal tool for raking leaves and debris from the lawn without causing damage to uneven surfaces.

Width	No of Teeth	Tooth Gap	Head	Handle
482mm	23	20mm	Polypropylene	121cm Metal

Kent & Stowe Lawn & Leaf Rake

This Kent & Stowe Long Handled Lawn & Leaf Rake is ideal for all clearing tasks and is used for gathering leaves and clippings.

The length of the rake is perfect for easy working and eliminates the need for bending.

Width	No of Teeth	Tooth Gap	Head	Handle
500mm	16	32mm	Stainless Steel	170cm Hardwood

Kent & Stowe Scarifying Rake

The Kent & Stowe Long Handled Scarifying Rake is ideal for encouraging healthy lawn growth. It removes thatch, moss and dead grass cuttings; opens up the soil surface to improve airflow and the uptake of nutrients and water.

It also prepares the ground for sowing new seeds and cutting through topsoil. Use after mowing the lawn and prior to putting down lawn seed.

Width	No of Teeth	Tooth Gap	Head	Handle
370mm	10	-	Stainless Steel	154cm Hardwood

EQUIPMENT & TOOLS

FORKS & SPADES

Kent & Stowe Digging & Border Forks

Useful for turning and breaking up compacted soil. Ideal for cultivation in the garden or allotment and helps to aerate soil ready for planting.

This lightweight digging fork is perfect for use in beds, borders or tighter spaces around the garden. The shank has been extended for improved strength. Plus it has a larger tread edge for added comfort.

Width	No of Teeth	Tooth Gap	Head	Handle
198mm	4	-	Stainless Steel	91cm Hardwood

Kent & Stowe Digging & Border Spades

Traditionally styled, high quality garden tool. This spade can dig and break up soil in large areas of a garden or allotment. This will help to improve drainage or edge garden beds.

The shank has been extended for improved strength. Plus it has a larger tread edge for added comfort.

Head	Handle
260mm Stainless Steel	110cm Hardwood

Bulldog Square Mouthed Shovel

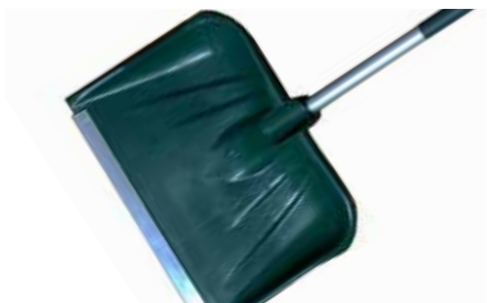

Use for general trench work, concrete mixing, tarmac & shovelling

Available with wood "T" & plastic "D" grip.

Head	Handle
305mm Stainless Steel	71cm Hardwood or Polyfibreglass

Bulldog Snow Shovel

The perfect tool for scooping up snow in the Winter and leaves in the Autumn.

The foam soft grip on the shaft ensures a comfortable use even in the cold weather. The wide, tough plastic moulded head is finished with a metal edge perfect for breaking and scraping ice.

Head	Handle
450mm Polypropylene	135cm Fibreglass

We offer a comprehensive range of tools from Kent & Stowe and Bulldog

About us

Here at East Riding Horticulture, being a family run business based in the beautiful East Riding of Yorkshire Countryside, we live and breathe our products. From our humble beginnings over 30 years ago on our farm, we have evolved and grown into a major horticultural supplier nationwide. Featuring multiple on-site warehouses holding an extensive range of stock, spread over 10,000 product lines.

With on-site warehousing we have products ready-to-go, delivered quickly and effectively via our own haulage fleet. East Riding Horticulture is a thriving, forward thinking business providing products for Horticulture, Landscaping and Forestry, Amenity Turf and Irrigation.

At East Riding Horticulture we know our customers appreciate good value, high quality and a broad range of products to choose from, combined with our team of experts in the 'field' possessing a combined knowledge of over 100 years, you are guaranteed to receive reliable advice and solutions ensuring you receive the right product at a competitive price. Working with our trusted, solid and reliable supply chain network we can deliver the advice and products you need, from the most reliable growing media and fertilisers to suit your requirements, advice on increasing yield to irrigation solutions.

We welcome new customers from all sectors of the industries we supply. Our emphasis is on friendly customer service, knowledgeable technical advice and providing specialist wholesale products to the industry, offering solutions for the growing world across the UK.
